### Detailed description of the invention

The invention is new thinking that came to light in June of 1999;

It incorporates many technologies that are on the market, but never

Used in this way, it can mirror and or direct an F14 Phantom jet on its

Way and pinpoint a problem before it starts, and is usable to

Areas, personnel and buildings, thus allowing an item to be in a matrix

Putting it through a series of situations while the subject is on screen

In what is called virtual reality.
